MCES Lake Minnetonka Facility Plan

Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, is developing a Facility Plan for the Lake Minnetonka service area. Projects included in this plan will serve communities within Hennepin and Carver County.

Upcoming Regional Sanitary Sewer Projects In Your Area

There will be two projects in your area aimed at improving efficiencies and system reliability. Both projects will be under construction from 2023 to 2025.

- 1** Orono Interceptor 7113 Relocation Project
- 2** Orono Lift Stations L46 and L49 Improvements

- Project Area
- Sanitary Sewer Pipe within Project Area
- Sanitary Sewer Pipe outside Project Area
- Municipal Boundaries
- Lift Station (Pumping Station)

What's a lift station?

MCES pumping stations or “Lift Stations” pump wastewater from low points in the local sanitary sewer system. Once “lifted”, wastewater flows by gravity through MCES’s regional pipes to a Metropolitan Council Regional Wastewater Treatment Plant. Pumping stations usually have an above-ground building to house mechanical, electrical, odor control and communications equipment.
